KREEPY KRAULY®

ULTRATEMP®-E
HIGH PERFORMANCE HEAT PUMP
Simply the most economical way to heat your pool and spa

PENTAIR AQUATIC SYSTEMS | WWW.KREEPYKRAULY.CO.ZA
Why should you choose an UltraTemp®-E heat pump? That’s easy. It offers the longest list of standard features available.

- The UltraTemp-E heat pump provides an AutoSet™ Temperature Control feature as standard. It monitors water temperature and turns the pump on and off as needed, overriding the time clock to maintain desired temperature.
- The UltraTemp-E 15 heat pump features the legendary DAIKIN Scroll® Compressor that’s more efficient, durable, reliable and quieter than any piston-driven compressor. It’s the best of the best.
- Pentair heat pumps used the EPA-recognized, environmentally safe, non-ozone depleting R-410A refrigerant. This has allowed the UltraTemp-E heat pump to be awarded the Eco Select® Brand for environmental responsibility.
- 100% titanium heat exchanger assures corrosion-free performance for extra long life and value.
- Easy to use, multi language LCD control board displays an intuitive, menu-driven readout with easy to follow, full word messages—no codes to memorize.
- Self-diagnostic software continuously monitors system for peak performance.
- Automatic defrost feature senses refrigerant temperature and helps prevent the UltraTemp-E heat pump from freezing, allowing the heat pump to operate at temperatures as low as -3°C.
- Perfect companion to IntelliPool® Automation Systems—using RS485 communication, IntelliPool® can not only operate and monitor UltraTemp®-E remotely, in case of alarms these will be sent to the IntelliPool ® and ultimately an e-mail notification can be configured.
- CE compliance, performance and efficiency independently certified by TÜV Rheinland.
- Pool/Spa function enables easy dual temperature control.
- Long-life corrosion resistant plastic panels.
- Corrosion resistant “blue fin” evaporator.
- After service available with hotline number and possibility of on site intervention.

Clearly, a heat pump is the best choice for pool heating. Also clear is the best-in-class performance and value of the fully-featured UltraTemp®-E heat pump. Contact your pool professional today to learn which model is right for your pool.
AUTOMATIC HEATING/COOLING FEATURE!

Pentair H/C model heat pumps are equipped to automatically heat or cool your pool water based on temperatures you set. Select the AUTO mode and the intelligent thermostat will automatically command the heat pump to heat or cool the water to your selected temperature.

Digital controls with dual thermostats offer precise temperature control for pool/spa combinations and avoid overheating and energy waste.

Self-diagnostic controls monitor and troubleshoot heat pump operations to ensure safer, dependable operation.

Long-life, corrosion-resistant composite cabinet retains a like-new appearance for years.

50mm plumbing connections for easy installation.
